2018-2019

2016-2017

## PROJECT

### Portfolio

Designed and developed a sleek and responsive personal portfolio website for showcasing my skills, projects, and contact information. Implemented a clean and modern design with easy navigation, utilizing HTML5, CSS3, and JavaScript technologies, along with enhancements such as FontAwesome and Typed.js for a polished and professional appearance.

### Hospital Management System

"Developed a comprehensive Hospital Management System, a web-based application that optimizes hospital operations and management. This system offers a user-friendly interface for seamless interaction with various tasks and processes. Leveraging HTML, CSS, and JavaScript for the frontend, and Python with Django framework for the backend, the application ensures a robust and efficient experience for staff members and administrators. The integration of SQL databases enhances data management, providing a centralized platform for secure storage and retrieval of crucial information within the healthcare facility."
